1. INTRODUCTION

The Nova Scotia Chiropractic and Naturopathic Regulator (NSCNR) is the regulatory authority for the practice of chiropractic and naturopathy in the Province of Nova Scotia.

The NSCNR serves and protects the public interest to advance ethical and competent chiropractic and naturopathic care in Nova Scotia.

A NSCNR Standard of Practice establishes the minimum professional practice expectations for Registrants holding an active naturopath license with the NSCNR who also hold a Reserved Practice Permit to perform **Injection Therapies and Intravenous Therapy** and are therefore authorized to perform these Reserved Practices.

This document contains pre-approved specific component training programs required for various versions of the NDRPP-IT+IV permits.

2. APPROVAL PROCESS

Specific component training is approved by the NSCNR via the Continued Education Committee.

Pre-approval ensures that training taken will comply with the requirements for Reserved Practice Permits of Injection Therapies, IV authorizations, Chelation therapy and IV iron administration. It is recommended to determine applicability for permit qualifications prior to enrolment.

If the program does not appear on the list below, an approval form can be submitted to: office@nscnr.ca to be provided to the CE Committee. Please refer to the full Standard of Practice for all training requirements to enable specific component training approval. The form is available at the end of this document.

3. NSCNR-APPROVED SPECIFIC COMPONENT TRAINING

Course Name	Teacher / Organization	Reserved Permit Applicable To	In Person Required	Approval
Yes* = Accepted only for applications by previous permit holders in another Canadian regulated jurisdiction with an active and current permit as of May 27, 2026.
